

Special Educational Needs Statement:

At 'Little Big Learners' we believe that every child is special and every child has needs. In order to meet the needs of these children it is important that we get to know the children and build good relationships with them. The more we get to know the individual children the more we will be able to provide them with activities that are both stimulating and motivating. We will always treat each child as an individual; recognising and respecting each individual need. All the children in our setting will be encouraged to respect and care for each other, regardless of any special need or disability. Any negative attitudes or remarks towards each other will be challenged and discussed. All children will have equal access to all activities.

Activities will be adapted to cater for our Special Needs children and one to one help will be provided wherever possible. All our children will be given choices and will work as part of the whole group. Any activities designed especially for them will also include children from the group.

During School Holiday Club, any planned activities, trips and outings will be suitable for all our children and extra support will be available if required.

Our parents will be asked for ideas and their views on any adaptations we could make to our setting to enhance their child's enjoyment. Our aim is to be able to include all children irrespective of their skills and abilities. We believe our setting provides children with exciting activities that will make each individual feel important, valued and build their self esteem.
